

INSTRUCTIONAL TECHNOLOGY SERVICES

2008 Technology Conference for Administrators Embracing 21st Century Learning

Discover how leadership, innovation, and the latest web technologies can transform teaching and support student achievement.

SPECIAL KEYNOTE

Dr. David Thornburg

David is an award-winning futurist, author, and consultant. His razor-sharp focus on the fast-paced world of modern computing and communication media, project-based learning, 21st century skills, and open source software has placed him in constant demand as a keynote speaker and workshop leader for schools, foundations, and governments. A central theme of his work is preparing students for their future, not for our past.

Mark Wagner

Mark is the president of the Educational Technology and Life Corporation, providing professional development and consulting services to schools, districts, and educational institutions. He coordinates the CUEtoYOU professional development program for Computer Using Educators, Inc.

Chris Walsh

Chris is a Digital Learning Specialist at WestEd. His recent projects include: Doing What Works, a site by the U.S. Department of Education, the Google Teacher Academy, and the Infinite Thinking Machine. Chris also served as an advisor to the 2004 National Education Technology Plan.

Steve Hargadon

Steve is the director of the K12 Open Technologies Initiative at the Consortium for School Networking (CoSN) and is the founder of the Classroom 2.0 social network. He blogs and speaks on educational technology and is passionate about Open Source Software, Web 2.0, and computing for low-income populations.
